

Backyard cutting

The Upward Diagonal Cut revisited

A while ago I wrote an article called "The upward diagonal cut" and from the number of views it has received along with conversations with other cutters on youtube and facebook, I found out that it wasn't just me that was finding it difficult. For this reason I eventually decided to bite the bullet and put a few of the larger issues surrounding the cut into a video which is sometimes easier to digest than a large amount of text. I'd be interested to hear from you as to what was more helpful.

The original article can be found [here](#) if you're interested and the video on correct grip amongst other things is [here](#).

Hope this helps to clear up the movement and hopefully the awkwardness that accompanies it for some people.
